

Flash Flood - Turn around, don't drown.

- Fill bathtubs, sinks and jugs with clean water in case water becomes contaminated.
- Listen to a battery-operated radio for the latest storm information.
- If local authorities instruct you to do so, turn off all utilities at the main power switch and close the main gas valve.
- If told to evacuate your home, do so immediately.
- Floodwaters may carry raw sewage, chemical waste and other disease-spreading substances. If you've come in contact with floodwaters, wash your hands with soap and disinfected water.
- Avoid walking through floodwaters. As little as six inches of moving water can knock you off your feet.
- Don't drive through a flooded area.
- Electric current passes easily through water, so stay away from downed power lines and electrical wires.
- Animals lose their homes in floods, too. Be aware that even domesticated animals may be confused and unpredictable in a flood situation.
